

SS SHOUTAN 2G

(手谈 2G)

User Manual

Shaobai Sun 2023

Introduction

- ❖ SS ShouTan (手谈) 2G is a GO game client running under 64-bit Windows 10 and above.
- ❖ SS ShouTan (手谈) 2G supports AI GO engines that output GTP messaging. For example, KataGO, Leela Zero (LZ), Sai (inherited from LZ), PheonixGO, GnuGO. These AI GO engines are freely available online for downloading.
- ❖ SS ShouTan (手谈) 2G allows games to be played between AI and AI, AI and human and human and human. It also support free hand stone setup.
- ❖ SS ShouTan (手谈) 2G can carry out instant win-rate curve, game analysis that outputs win-rate and suggested move lines, territory estimate, etc.
- ❖ SS ShouTan (手谈) 2G can save a game to or load a game from SGF files or databases. It provide database management, such as export and import.
- ❖ SS ShouTan (手谈) 2G offers Many more. You will see some details later in this manual.

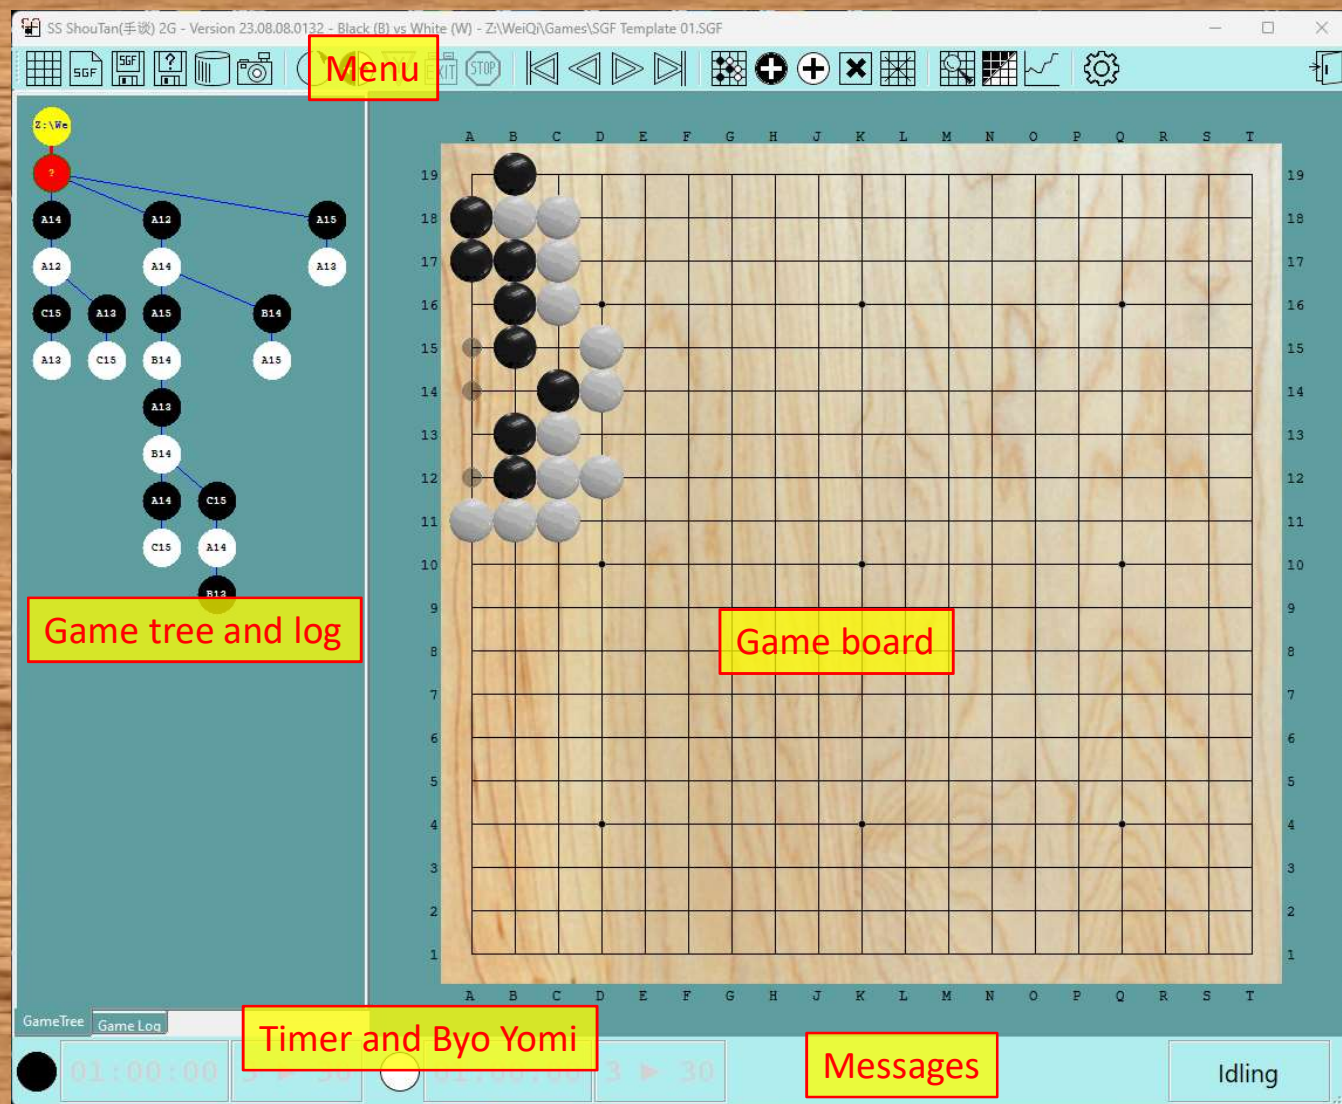

Prerequisites

- ❖ Windows 10 and above, 64-bit.
- ❖ A good graphic card (GPU), such as NVIDIA 3000+ or AMD 6000+. Though it is not a must, most AI GO engines employ GPU intensively. It is recommended that the GPU supports CUDA and Tensor RT.
- ❖ Microsoft Net 6 runtime is installed. If not, when you first time run the application, you will be prompted to download and install.

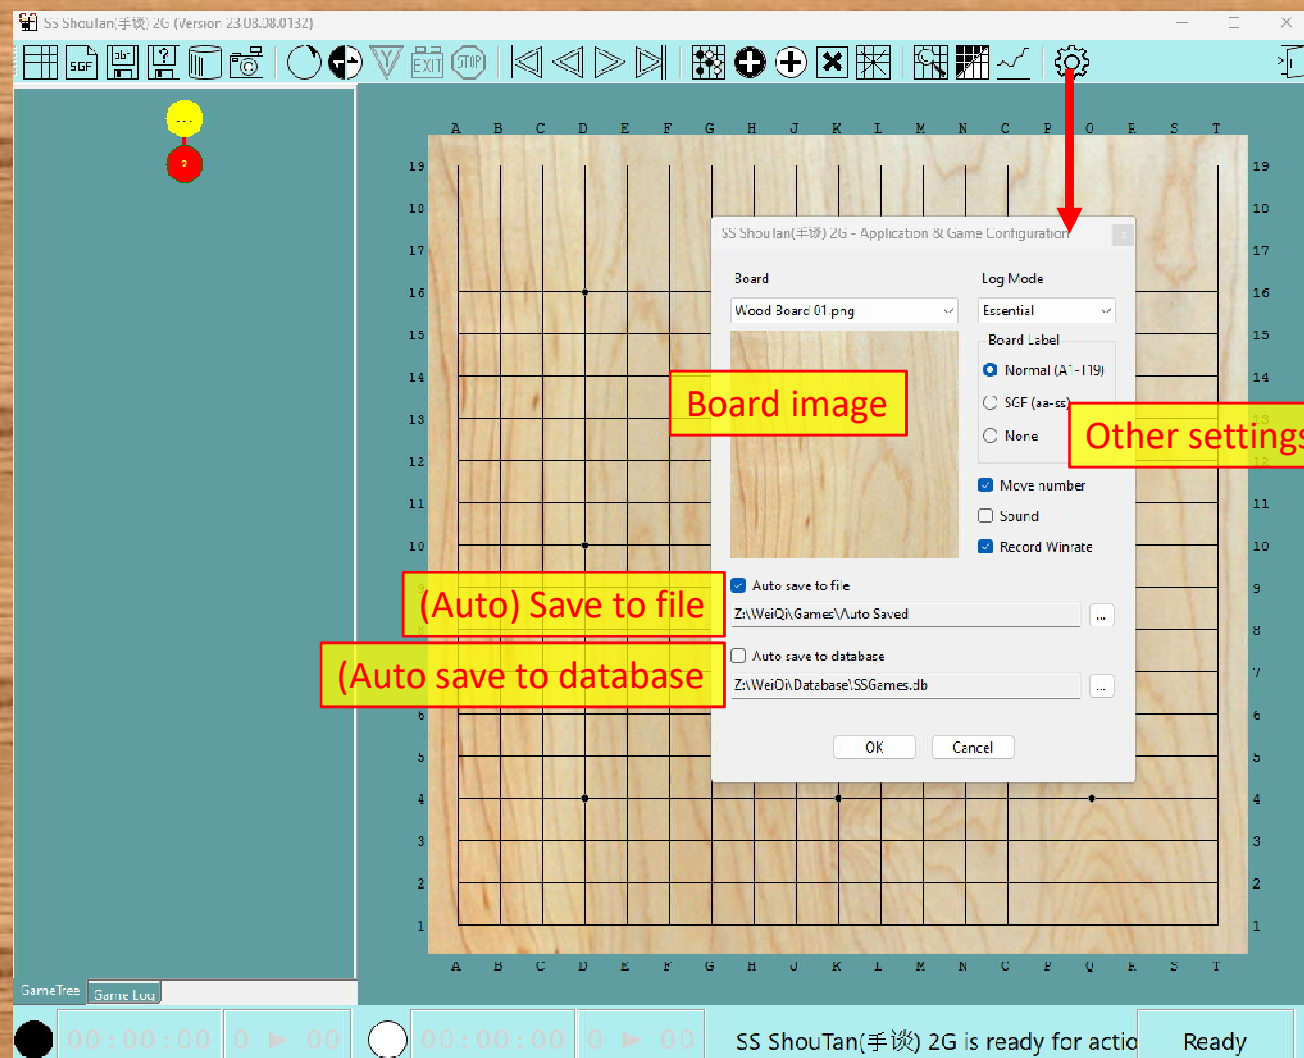

Installation

- ❖ Download the latest zipped file “SS ShouTan 2G xx.xx.xx.xxxx.zip”.
- ❖ Unzip the file into a folder of your choice.
- ❖ Double click on “SSShouTan2G.exe”, or you may create a shortcut on the desktop for easy access.
- ❖ As I mentioned in the Prerequisites, if you do not have Microsoft Net 6 runtime installed, you will be prompted to download and install from a Microsoft site.
- ❖ At the first time run, you may want to configure the application for many things. This will be covered later in this manual.
- ❖ You have to download and install the AI GO Engines your like. Configure an engine itself is beyond the scope of this manual. One thing for sure is that the engine must output GTP messages by an argument. (Please refer to the site)
